

The cross-browser live test (Chrome, Firefox, Microsoft-edge, opera) doesn't have any major issues.

However, the problems with the Internet Explorer are:

The grid layout does not work.

The Hometown SVG in the about.html page is comparatively small to the actual design.

Font-color for the navigation is also not exact.

The list of Linters I used for this project

1.HTML linter known as W3c validator

2.CSS linter is known as linter-stylelint

The other plugins I used for the Atom text editor are as follows:

-ask-stack

-atom-beautify

-atom-live-server

-emmet

-file-icons

-highlighted selected

-linter

-linter-jscs

-minimap

-minimap-pigment

-pigments

-todo
